

Catalog of Bombyliidae (Diptera) Collection “Lucia Duşa” from the Zoological Museum of “Babeş - Bolyai” University

Geanina-Magdalena IACOB, Andrei CRIŞAN, Cosmin-Ovidiu MANCI & Cristian SITAR

Summary: In this paper we present Catalogue of Bombyliidae (Diptera) Collection made by Lucia Duşa at the “Babeş-Bolyai” University’s Zoological Museum. The collection contains 111 species and 2794 specimens. We also present the scientific activity of Lucia Duşa, which consists of 17 scientific papers.

Keywords: Bombyliidae, Collection, Lucia Duşa, Zoological Museum of the “Babeş-Bolyai” University, faunistic, Romania

In Romania, the first faunistic researches on Bombyliidae were carried out by F. G. MAYER (1853), KOVARTZ (1873), S. MOCSÁRI (1875), G. STROBL (1896), Ed. FLEK (1904) and ENGEL (1937). Their studies were reviewed in 1959 by IONESCU and WEINBERG and at that time 43 species of Bombyliidae having been mentioned for Romania (WEINBERG, 1982).

At the beginning of the 1960’s, in Romania 10 genera were known: *Anthrax*, *Exoprosopa*, *Argyramoeba*, *Calcochiton*, *Lomatia*, *Bombylius*, *Systeochus*, *Dischistus*, *Ploas* and *Tomomyza*. From the genus *Bombylius*, only 12 out of the approximately 75 species known in Europe had been signaled (RADU and DUŞA, 1963). At that time, data regarding the Romanian Bombyliidae were scarce, while throughout Europe, over 400 species belonging to 40 genera were known. Furthermore, the biology and ecology of these dipterans were also scarcely known (RADU and DUŞA, 1963).

After 1960, research regarding the Bombyliidae was undertaken by Lucia DUŞA, main curator of the “Babeş-Bolyai” University’s Zoological Museum.

Lucia DUŞA was born in Bistriţa-Năsăud county and graduated the Biology Faculty within the Cluj University. Because of her attraction towards entomology, she was noticed by Professor Vasile Gh. RADU, later becoming his assistant. Starting with 1951, she became curator of the “Babeş-Bolyai” University’s Zoological Museum, and later on, main curator, until 1985, when she retired.

Under the guidance of Prof. Vasile Gh. RADU, she has performed morphological, anatomical and faunistic research on Bombyliidae and Phoridae (Diptera: Bombyliidae, Phoridae, Dorylaidae). Her

first research was conducted in the Cluj area and Banat region, later on expanding to the entire country (Fig 1-2.).

As a novelty element for entomological researches in Romania, she introduced criteria based on the genital structures in the study of these species. Furthermore, she contributed substantially in the study of the Bombyliidae mouth parts and their oviposition.

Internationally, Lucia DUŞA has collaborated with W. ZAITZEV, from the Zoology Institute of the USSR Academy of Science (Sankt Petersburg) and obtained by exchange specimens from France, Switzerland, USA and Brazil. At national level, she collaborated with M. WEINBERG and M.A. IONESCU.

She has published 17 scientific papers, 12 of them regarding the Bombyliidae, in which she reports 35 new species for the Romanian fauna. The species that she first reported and details about findings within the national fauna were in publishing order:

Amictus validus (LOEW, 1869) - 4 specimens Mangalia, 13.08.1962 (RADU and DUŞA 1963b);

Bombylius quadrifarius (Loew, 1855) - 1 specimen Cluj, 17.07.1962 (RADU and DUŞA 1963b) (Fig. 3);

Cyllenina rustica (ROSSI, 1790) published under name *Cyllenina maculata* (LATREILLE, 1802) - 1 specimen Orşova, 7.07.1963; 1 specimen Băile Herculane, 10.07.1963 (DUŞA 1964a) (Fig. 4);

Bombylius nubilus (MIKAN, 1796) - 12 specimens Tudor Vladimirescu (Eforie), 9.05.1963 (DUŞA 1964a);

Bombylius trichurus (PALLAS in WIEDEMANN, 1818) published under name *Bombylius fuliginosus* (PALLAS in WIEDEMANN, 1818) - 8 specimens Babadag, 11.05.1963; 1 specimen Mangalia, 10.05.1963 (DUŞA 1964a);

Exhyalanthrax (Thyridanthrax) afer (FABRICIUS, 1794) - 1 specimen Sântion, 24.07.1963 (DUȘA 1964a);

Exhyalanthrax (Thyridanthrax) vagans (Loew, 1862) - 1 specimen Mangalia, 2.08.1963 (DUȘA 1964a);

Ligyra (Exoprosopa) ferrea (WALKER, 1849) - 4 specimens Mangalia, 2.08.1963 (DUȘA 1964a);

Petrorossia hespera (ROSSI, 1790) - 1 specimen Orșova, 7.07.1963 (DUȘA 1964b);

Lomatia erynnis (LOEW, 1869) - 2 specimens Cluj, 2.06.1961 (DUȘA 1964b);

Micomitra (Exoprosopa) iris (LOEW, 1869) - 1 specimen Mangalia, 15.08.1962; 12 specimens Mangalia, 25.07.1963, 2.08.1963 (DUȘA 1964b);

Villa cingulata (MEIGEN, 1804) - 1 specimen Lemnia, 29.07.1963 (DUȘA 1964b);

Bombylius minor (LINNAEUS, 1758) - 1 specimen Lacul Sărat, 31.05.1962 (DUȘA 1964b);

Phthiria vagans (LOEW, 1846) - 1 specimen Limanu, 3.07.1964 (DUȘA 1966);

Phthiria gaedii (WIEDEMANN in MEIGEN, 1820) - 2 specimens Limanu, 3.07.1964 (DUȘA 1966);

Geron gibbosus (MEIGEN, 1820) - 1 specimen Hagieni, 4.08.1964 (DUȘA 1966);

Bombylius venosus (MIKAN, 1796) - 1 specimen Tudor Vladimirescu (Eforie), 9.05.1963 (DUȘA 1966);

Bombylius lejostomus (LOEW, 1855) - 2 specimens Pădurea Comorova, 2.06.1964 (DUȘA 1966);

Bombylius niveus (MEIGEN, 1804) - 1 specimen Agigea, 5.07.1964; 2 specimens Agigea, 5.07.1964, 2.08.1964 (DUȘA 1966);

Systoechus microcephalus (LOEW, 1855) - 9 specimens Agigea, 5.07.1964, 12.08.1964 (DUȘA 1966);

Desmatoneura (Chionamoeba) nivea (WILLISTON 1895) - 2 specimens Agigea, 4.07.1964, 2.08.1964; 2 specimens Istria, 17.07.1964 (DUȘA 1966);

Villa ventruosa (LOEW, 1869) - 3 specimens Limanu, 3.07.1964 (DUȘA 1966);

Exoprosopa jacchus (FABRICIUS, 1805) - 20 specimens Hagieni, 4.08.1964 (DUȘA 1966);

Bombylisoma (Dischistus) brevisculus (LOEW, 1856) - 2 specimens Hagieni, 20.06.1964, 29.06.1964 (WEINBERG and DUȘA 1967);

Beckerellus (Bombylius) androgynus (LOEW, 1855) - 5 specimens Băneasa, 16-17.07.1964 (WEINBERG and DUȘA 1967);

**Bombylius flocossus* (LOEW, 1857) - 1 specimen Cogeacu, 2.06.1965 (WEINBERG and DUȘA 1967);

**Anastoechus arcalius* (PARAMONOV, 1940) published under name *Anastoechus hyrcanus* (PARAMONOV, 1940) - 3 specimens Hagieni 30-31.08.1964 (WEINBERG and DUȘA 1967);

Villa fasciata (MEIGEN, 1804) published under name *Villa circumdata* (Meigen, 1820) - 7 specimens Hagieni, 5.07.1965; 16 specimens Limanu, 3.07.1964; 1 specimen Limanu, 24.07.1965; 1 specimen Comorova, 25.08.1965; 2 specimens Albești,

4.06.1964 (WEINBERG and DUȘA 1967);

Phthiria pulicaria (MIKAN, 1796) - 1 specimens Chinteni, 20.07.1964 (DUȘA 1973);

Phthiria umbripennis (LOEW, 1846) - 2 specimens Hagieni, 5.07.1965 (DUȘA 1973);

Bombymbilius citrinus (LOEW, 1855) - 4 specimens Albești, 23.07.1965; 2 specimens Mangalia, 25.07.1963 (DUȘA 1973);

Bombylius pumilus (MEIGEN, 1820) - 1 specimen Hămeiuș, 16.07.1965; 1 specimen Jupalnic, 10.07.1964, 2 specimens Căprioara - Arad, 13.07.1961; 10 specimens Chinteni, 12.06.1965; 6 specimens Tisa-Arad, 7.07.1962; 3 specimens Baia Mare, 3.07.1965; 8 specimens Finteușul Mic, 20-25.06.1964 (DUȘA 1973);

Lomatia grajugena (LOEW, 1869) - 1 specimen Mahmudia, 25.05.1971 (DUȘA 1973);

Anthrax trifasciatus (MEIGEN, 1804) - 1 specimen Cluj, 15.06.1963 (DUȘA 1973);

Villa claripenis (KOWARZ, 1868) - 1 specimen Jupalnic, 10.07.1964; 1 specimen Pojoga, 8.07.1962; 1 specimen Bucovăț, 6.07.1964; 1 specimen Buzău, 19.07.1965; 1 specimen Rătești, 20.07.1965 (DUȘA 1973).

*Species reported in publications for which there are no specimens in the collection.

In 1966, she collected *Petrorossia* specimens from the sands of the scientific reservation of Agigea, based on which she described a new species, *Petrorossia dobrogica*, based on morphological criteria and the genital armature (Fig. 5):

1♂ Holotype Agigea, 4.06.1966; 1♀ Allotype Agigea 1.08.1964; Paratype 7♂ Agigea 4.06, 1.08.1964, 2.08.1964; 6♀ Agigea 26.07.1964, 27.07.1964, 1.08.1964.

EVENHUIS and GREATHEAD (1999), in *World catalog of bee flies (Diptera: Bombyliidae)*, considered *Petrorossia dobrogica* a valid species. However, in the revised edition from September 2015 of the same Catalogue, the species was synonymized with *P. hespera*.

Collection catalogue

Initially, the collected material was prepared, determined and systematically organized in the form of a collection. The labelling was done by 2–3 labels written with black ink, containing the date and place of collection, legit, the person who performed the determination and the species name. As the space

initially allocated for the collection was insufficient, the material collected later was deposited in other boxes, but without being systematized. For making the present catalogue, the reorganization of the material and update of the species name was necessary. The update of the species name was performed according to *Fauna Europea* (<https://fauna-eu.org/>), ALLRED *et al.* 1965, PAPP and DARVAS 1997, EVENHUIS and GREATHEAD 1999, 2003, 2015, KATBEH-BADER and ARABYAT 2004, HAKIMIAN *et al.* 2012 and SIMT 2013. While the material was reorganized, to each specimen was attributed an inventory number.

The last specimens collected by Lucia DUȘA were determined, but the ink labels were not added by her, having the collection data written by hand, with pencil. These specimens currently have a printed label.

Within this material, two specimens of *Bombylius fimbriatus* (Băneasa, Constanța County, 11-12.05.1969) were found. In the systemized part of the collection there are also two specimens from France, the specimens from Romania being probably the first certain record of the species in Romania. We are not aware of any publications regarding presence of this species in Romania but this is already published in the last version of EVENHUIS and GREATHEAD (2015).

The collection contains 111 species and 2794 specimens. The collection data is available in Appendix 1.

Aknowledgements

We would like to thank Professor dr. Nicolae TOMESCU for providing information regarding the professional life of Lucia DUȘA. We thank László Rákosy and an anonymous referee for very helpful comments on the manuscript. We also would like to thank Angela IONICĂ for improving the English language of our manuscript.
